

I really think if you discontinue the XM traffic and Weather, I will then avoid major metro areas when I travel. This will prevent me from spending \$\$\$ for hotels, food and fuel. When I travel and have concerns about traffic and weather, I avoid major metro areas. Now I know the traffic and weather and plan on driving thru the areas. If you kill XM Travel and Weather, you are seriously misguided. When I have to put up with individuals telling me how to suck cock on the radio, that bothers me. When I hear traffic and weather, other local stations might complain, but at least I, the end user, the ultimate consumer, and do not suffer. Look out for the user and ultimate customer, me, the listener, your job is to protect me from criminal violations and indeciency, not fair competition. Thank You.
